(57) Abstract :

ABSTRACT Title of the Invention:-Shanesh's DigiGoniometer Introduction:- Accurate measurement and analysis of joints' range of movement (ROM) are important for assessing joint related health conditions and are valuable to clinicians for diagnostic and rehabilitation purposes. As an alternative to using the camera-based methods which are restrictive and expensive, we have developed the use of microelectromechanical devices such as accelerometers for measuring human joints movement. This patent presents the development of an accelerometer based system to measure range of motion of upper extremities lower extremities. CONCLUSION; This instrument will give the exact (accurate) measurement of range of motion (ROM) and will be more efficient and cost effective than the traditional Goniometer. Thus it will be very helpful for patients for their further prognosis and management at affordable cost.

Pesticides are hazardous to human health and well-being. Pesticide residues in food and water are considered agents for chronic health diseases such as immune suppression, hormonal disturbances, neurotoxic effects, and cancers. Children are at higher risk of pesticide exposure because of dietary intake as they consume more food per unit body weight as compared to adults. Food samples from India were found to be beyond the permissible acceptable limits. The routine use of pesticides has become an occupational hazard. Pesticides are commonly used as a poison for suicidal purposes in India. It is the second most common mode of suicide in India. The author's report revealed that self-poisoning deaths are 25,172 per year. Several studies showed that the real number could be three times higher than is reported. Suicidal and accidental poisoning deaths add up to 80,000 deaths every year. It is due to easy availability of toxic pesticides. The toxicological pesticide effects caused malformation in these Indian communities. Indian farmers also rarely use safety measures due to lack of education, reasonably priced protective equipment, poor regulation, and enforcement.
